A SHORTENED STATUTORY PERIOD FOR REPL' WHICHEVER IS LONGER, FROM THE MAILING D. Extensions of time may be available under the provisions of 37 CFR 1.1: after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period v. Failure to reply within the set or extended period for reply will, by statute Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	ATE OF THIS COMMUNICATION 36(a). In no event, however, may a reply be tim will apply and will expire SIX (6) MONTHS from , cause the application to become ABANDONE	N. nely filed the mailing date of this communication. D (35 U.S.C. § 133).			
Status					
1) Responsive to communication(s) filed on <u>08 A</u>	<u>ugust 2005</u> .				
2a)☐ This action is FINAL . 2b)☒ This action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the ments is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims					
4) ☐ Claim(s) 2 and 5-7 is/are pending in the application 4a) Of the above claim(s) is/are withdraw 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 2 and 5-7 is/are rejected. 7) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) are subject to restriction and/or	wn from consideration.	•			
Application Papers					
9)☐ The specification is objected to by the Examiner.					
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/8/05 has been entered.

Claim Rejections - 35 USC § 103

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ariki et al (U. S. Patent no. 6,302,498) in view of Ross et al (U. S. Patent no. 5,207,525).

 Ariki et al discloses: See figure 2 blind hole in first member piston 24, second member/pin 21

Ariki et al does not disclose a channel in the first or second members with a flat cut surface. Ross et al teaches a pin (figure 6, 40) with a flat cut surface (44) inserted into a blind hole (figure 4, 14) in order to reduce the force required to insert the pin into the hole. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a pin with a flat cut surface as taught by Ross et al in the device of Ariki in order to make assembly of the final product easier and cheaper. Less force required means less sophisticated equipment can be used, defects from

Application/Control Number: 10/622,716

Art Unit: 3683

deformation reduced, and less material on the pin needed to ensure such deformation does not occur.

Page 3

4. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ariki et al in view of Holland et al (U. S. Patent no. 5,354,187).

Ariki et al is relied upon as above. Ariki et al does not disclose the not through hole having a concave bottom and the second element having a convex bottom. Holland et al teaches the not through hole having a concave bottom and the second element having a convex bottom (see figure 5). It would have been obvious to one of ordinary skill in the art at the time the invention was made as the exact shape of the bottoms of the elements are merely design choices. By leaving the bottom of the not through hole with a concave bottom, it reduces the need for machining since the bottom does not have to be flattened after it is drilled out (normal drill bits leave a concave bottom because of the drill tip). A convex bottom of the second element helps to guide the second element into the hole since the sides will force the second element to a central position as it is pushed down.

Response to Arguments

5. Applicant's arguments with respect to claims 2 and 5-7 have been considered but are most in view of the new ground(s) of rejection.

Art Unit: 3683

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
